..... Includes specific suggestions for TTOCs, about
what to do and how to build your skills.

Start UP! Your Math Class

*Learn how to begin your intermediate math class, with practical
strategies and resources designed for early career teachers
like you.*

*Learn games and math strategies you can rehearse as you TTOC
so you will be skilled and confident when you get your first class.*

*Build their math confidence as you engage
and motivate your students with hands-on math tools.

'Start UP! Your Math Class: Build their Math Confidence

Ann-Marie Hunter Gr. 4-9

How often do you hear from students, "I can't do Math" or "I'm just not good at Math"? These attitudes can greatly interfere with students' success in Math learning! As their teacher, you are one of the prime influences on your students and you can help them to revamp their attitudes to help them to become successful Math learners! This workshop will offer strategies to reduce Math anxiety in students. We will discuss how to focus on individual needs and how to use hands-on tools to strengthen Basic Skills. Strategies presented are designed to build student confidence, helping students to be more engaged and successful in Math.

Ann-Marie Hunter, from Kamloops, started her teaching career as a high school Math teacher and once she transferred to intermediate grades, she never looked back! Ann-Marie thoroughly enjoyed being the Math 'Go-to' person in the elementary setting, helping to foster the love of Mathematics!

We appreciate the financial support of PSAs, myPITA, BCATML, Rural Schools; BCTF Locals & Prod Cmtees such as Burnaby & Surrey & the RR Smith Fdn (retired teachers).
